Summary — Full Stack Developer Intern, available for a 3-month internship (internship agreement). Full-stack development, front-end and back-end, from specification to working application (Java, PHP, JavaScript, PostgreSQL).

Projects

Excel-like Spreadsheet 01/2025 - 04/2025

- Team project (3 people): desktop application in **Java** / **JavaFX** (MVVM architecture, Builder pattern).
- Recursive cell formulas, operator precedence, import/export in a custom file format. Requirements evolved over 2 iterations, with architecture refactoring.

Auction E-commerce Website 11/2025 - 05/2026

- Team project (2 people), 3 iterations: 20 features split between us and tracked on **Trello**.
- **PHP** backend (MVC) with **MySQL** and transactions for bidding and purchases.
- Search, filters, AJAX requests in **JavaScript**, Post-Redirect-Get pattern.

Restaurant Reservation App 03/2026 - 06/2026

- Team project (2 people): cross-platform **Flutter** frontend (Dart), **PostgREST** REST API, **PostgreSQL** database.
- JWT authentication, management of restaurants, services and customers.
- User interface implemented from a provided mockup (Flutter).

Secure Corporate Network 01/2026 - 06/2026

- Individual project: WAN / LAN / DMZ network with **pfSense** and **VirtualBox**.
- **Windows Server** 2019 with **Active Directory**, organizational units and GPOs.

Skills

Front-end: JavaFX, JavaScript, Flutter, HTML, CSS, Dart

Networking & tools: Trello, pfSense, VirtualBox, Windows Server, Active Directory, Git

Back-end: Java, PHP, Python, REST API

Databases: MySQL, PostgREST, PostgreSQL

Methods: Agile (iterative development)

Education

Bachelor's in IT, Application Development 2023 - 2027
